

Appln. No. 09/932,815

Attorney Docket No. 10541-607

I. Amendments to the Specification

Please replace Paragraph [0017] with the following Paragraph:

[0017] The armrest 10 has an injection molded plastic body which has a major surface 12 covered in a soft-feel material and an edge region 14 where hard plastic is exposed. More specifically, the edge region 14 is a flange extending away from the major surface 12 in a direction substantially parallel thereto. This invention is concerned with the region where the soft and hard surfaces meet, i.e., the detail at the junction line 16.
